

## TMD/382 Premium Conference Microphone

Article no.: 01.0740

### Description

Professional electret microphone with illuminated ring on the underside of the microphone head to cover a wider viewing angle.

The new design of the housing and the implementation of specially developed RF filters in the microphone head produce excellent RF suppression.

The TMD/382 has an effective and robust shock mount system, is equipped with an integrated windscreen and a very natural, linear frequency response.

It has a rigid microphone neck with gooseneck hinge and high quality connector (Neutrik MINICON), matt black finish.

It provides a low susceptibility to interference from mobile phones and other RF devices operated in close proximity.

### Technical data

Complies with international standard IEC60914

**Transducer Principle**  
Electret condenser

**Directivity**  
cardioid

**Frequency Response**  
100Hz - 20KHz

**Sensitivity** (free field, no load, 1 kHz)  
-44 dB (0dB = 1V/Pa)

**Output Impedance**  
1 kOhm

**Max. SPL** (Signal pressure level)  
122 dB

**Signal-to-noise Ratio**  
>72 dB (A-weighted, 1kHz)

**Operating Voltage**  
5 VDC (1.5V ... 10V)

**Indicator ring**  
color red  
Nominal current 20 mA (50 mA max.)

**Connector**  
Neutrik Minicon, lockable

**Dimensions**  
Total length 360 mm  
diameter 16.0 mm

**Weight**  
87 g

### System components

#### Delegate units

The TMD/382 works with any Brähler delegate unit that has a Minicon connector.

#### Variants

- 500mm total length available  
Art. no.: 01.0741
- Other lengths available on request
- Dual gooseneck version available for lecterns or interpreter consoles.  
Art. No.: 01.0742
