

DIGIMIC lean⁺ modular

Power Frame and Power Frame Cover

Application example
Power Frame Cover aluminum

Description

DIGIMIC lean⁺ modular is the delegate unit for your conference. Discreetly integrated into the tabletop, it offers the best conditions for your conference themes.

The DIGIMIC lean⁺ modular units are available in two installation variants: Power Frame and Power Frame Cover.

The Power Frame is made of powder-coated sheet steel. It encloses the DIGIMIC lean⁺ modular unit elegantly and discreetly, integrating it harmoniously into the table.

The Power Frame Cover models consist of a Power Frame with aluminum flap. The aluminium flap closes the DIGIMIC lean⁺ modular unit when it is not in use and thus protects it. Thanks to its discreet appearance, the Power Frame Cover also fits perfectly into your conference room when closed.

DIGIMIC Power Frame and Power Frame Cover are available in different colors and lengths.

Technical Data

Features

- Discreetly integrated into the table top
- Compact installation
- Available in different colors
- Available in different length
- Protect the DIGIMIC lean⁺ modular unit

Housing

- Powder-coated sheet steel (Power Frame)
- aluminum flap (Power Frame Cover)

System requirements

Required system components:

- DIGIMIC lean⁺ modular unit (available in different versions)

Required central units:

- DCen32
Article no.: 05.0050
- DCen32 mini
Article no.: 05.0420

Microphones:

- TMD/01
Article no.: 01.0711
- TM58/6
Article no.: 01.0560
- TMD/382
Article no.: 01.0740
- TMD/CL
Article no.: 01.0750

(all microphones are available in different lengths)

Software:

BrählerOS conference software for network-based control of all DIGIMIC system components. Simple configuration of all delegate units from one central location.
