brähler SYSTEMS

BCC2 Camera Controller

External control for Brähler PTZ cameras

Article no.: 07.0911

Description

With the camera system from Brähler Systems, you will always have your conference in the best light. In conjunction with the CamControl software, the system always provides the best possible camera image for each speaker. The individual camera positions can be set via web interface or via the external IP Camera Controller.

The IP Camera Controller also allows you to intervene live in the action, for example when speakers leave their predefined position. With the IP Camera Controller, the camera image can be adapted live to the new situation.

The IP Camera Controller is easy to operate via joystick, buttons and rotary knobs. The controller is connected to the Brähler camera system via a standard network cable.

Features

Features
- Simple operation via buttons, rotary knobs and joystick
- Easy saving of camera positions
- Individual settings in live operation
- LCD display
- web interface

Connections
- 1x RS232/RS422 VISCA
- 1x Network port RJ45 PoE
- Power supply DC 12V
- Tally/contact
- Kensington Tally

Housing
Robust metal housing
WxHxD: approx. 270 x 135 x 110 mm
Weight: approx. 1.24 kg.

System requirements

Camera system
- SDI-MS16 Video Switcher
  Article no.: 07.3786
- PTZ980 Camera
  Article no.: 07.0920, 07.0921

System components
The Brähler camera system works with microphone control units DCen and microphone units CMic or SMic.

Software for automated PTZ control
- CamControl 2
  Or
- brählerOS including the CamControl module (brählerOS is mandatory for SMic units)
