

INFRACOM TK50

Transport case

Article no.: 06.7100

Description

With the TK50 transport case, you can transport and store up to 50 INFRACOM receivers IRX from Brähler Systems.

In combination with an external power supply unit, the transport case also becomes a charging case. Up to 50 IRX units can be charged simultaneously. This is done through charging contacts on the units and in the TK50.

Both the recipients and the storage compartments are numbered consecutively. This simplifies the control of the issue and return. It also helps to ensure structured loading.

The storage units are built into a sturdy housing and protected by a removable one. The transport case can be locked with a lock. For easy handling, it is equipped with a retractable carrying handle.

Properties

- 50 storage compartments
- Lockable
- Removable lid
- Retractable carrying handle
- Internal connection for power supply unit
- Dimensions (WxDxH): 640x410x220 mm
- Dimensions power supply compartment (WxDxH): 132 x 58 x 30 mm
- Weight without equipment: approx. 11.5kg

System Accessories

System components

- IRad infrared radiator
Article no.: 06.6230
- ICen IV Infrared transmitter
Article no.: 06.4600
- IRX Infrared receiver
Article no.: 06.5801
- DOL7 Interpreter desk
04.2541.07
- Connection cable BNC 50 Ohm, various lengths
- SV/BNC IR signal distributor
Article no.: 06.6210

Optional component

- PSUTK50-A100 Power supply unit
Article no.: 19.0890
