

brählerOS B1 Server

Computer for *DIGIMIC* conference systems

Article no.: 07.3680

Rückansicht

Description

A complete conference system from one source - Brähler Systems makes this possible with the new BrählerOS B1 server.

Pre-installed software makes the use of the computer particularly fast and efficient. The complete conference solution brählerOS is already pre-installed and configured. With DCen Config and DANTE Controller you have full control over your conference system. In addition, the brählerOS B1 server has the Brähler SupportTool. This means fast help without long journeys - simply via the Internet.

Multiple network connections provide a large network bandwidth. SupportTool, conference system and multimedia units, for example, work in different, separate networks.

The BrählerOS B1 Server works with the Windows Server 2016 operating system from Microsoft. Mouse, keyboard and screen are not included in the delivery.

Features

- Fast deployment through pre-installed software:
